Career Statement

Motivated Mobile money has been a game changer in the african continent. Its adoption has seen many sectors of the economies benefit with increase ease of doing business. On the flip side, there is increase in cybercrime necessitating more vigilance and regulation of mobile money. As a Data Engineer enthusiast, I know that to overcome data breach a multi-disiplinary approach is needed and I'm excited the opportunity this presents to me as a Software Engineer.

Work Experience

JamboPay

May 2024 - Jan 2025

Software Engineer

Nairobi, Westlands

- Developed a backend aggregation service using Go and PostgreSQL to deliver robust transaction APIs and ensure data integrity by eliminating invalid entries, showcasing system design and performance optimization.
- Implemented multi-format report downloads that reduced generation time by 70%, underscoring expertise in scaling solutions and reliability engineering.
- Integrated Swagger for API documentation in a Golang project, enhancing API usability and supporting clear technical documentation for cross-functional collaboration.
- Diagnosed and resolved download feature errors using Postman, significantly improving error handling and backend reliability by achieving a 100% reduction in failed download reports.

JamboPay

Jul 2023 - May 2024

Junior Software Developer

Nairobi Town

- Enhanced the Merchant Portal by adding a multi-billing UI, reducing client billing time by 90% and contributing to efficient backend system operations.
- Redesigned the payouts page and introduced a receipts feature, boosting transaction clarity and reducing user queries by 70%, demonstrating a keen focus on user-centric backend improvements.
- Remediated bugs in the Wallet Report microservice using Akka.NET, thereby improving mailing queue reliability by 80% and supporting optimized backend performance.

JamboPay

Nov 2022 - Jul 2023

Software Developer Intern

Nairobi Town

- Implemented paginated payout transaction retrieval in ASP.NET & MSSQL, boosting data access speed by 40%.
- Fixed performance issues affecting commission records in Merchant Portal improving data availability.

Education

AkiraChix

Jan 2022 - Dec 2022

Diploma, Information Technology
